~~Chief~~ ^{PF}

This morning, the Chief called us all in to his office after the morning briefing from ⁰⁷⁰⁰ 0745. Present were Chief, DC Bell, CAO Barker, Kevin McLooney an Christiane Hureault and myself.

The Chief began by saying he floundered last week and because we had switined riders partway through - indicating the switch between Rheanne & Dwyer to Patterson. The Chief ~~set~~ ^{and} the team will not change any of the players until the operation is over - unless "Bill gets hit by a truck".

He said anyone who undermines the operational plan he will crush them (said it twice with twitching chin) and that anyone who executes the plan will be supported. Told Take away was don't bother arguing is arguing that Patterson opposes - Chief & he are in communication and whoever gets in their way will be crushed.

Talked about the plan for briefing the ~~embodied~~ ^{cell} ^{take} of prisoners & commanders and he spoke of a type of conspiracy that is happening at Provincial & Federal levels that this team is being handled by their political masters and that promoted the idea they are not really here to help.

I advised that they were asking us not to bring the politics into our operations - he got angry & told me that this was all political, and that ^{PF}.

I asked him not to bring that baggage into the room.

even he met with them today - he went back - from
and I was the only one in the room who challenged
any of what he said.

This was the second time in the day (between 715-
(imposed) 930) that he 'put me in my place' for bringing up
what an open crowd would include more negotiation
That is what OPP are promoting as a much more viable
option than to go in with force.

I told him this in the "threat - intimidation" speech
he gave^{us} and @ 715-715 briefing.
~~at noon~~

Pattern arrived @ 474 @ 1140-ish in time for the noon
presentation @ Pat Hayes boardroom. He asked to speak
to me about the Audium - Sussex operation and drew
a picture on my board about what the group was
wanting to meet to. For the third time in days I
asked if he was sure that it was in front of the
Chateau Louisa and not at the western end of
Willingham behind the other trucks - he said he was
sure - it was on Sappers Bridge - in front of the
Squire. We agreed and he indicated me for saying
they could join the trail end - how could they, there
was a barrier - I said I thought it was a barrier
spot as they would then open up the investigation
in front of Rudeau center possibly open it up as
a result.

He kept going on about 200m was not a win for us
and so he was going to go action on. It spoke

of fact Farzade was not willing to talk & that
 PT had no intel on what Steve K @ city & Farazzo spoke
 about. Seemed to insinuate they should have stayed
 in the room. REDACTED
 REDACTED

- Patterson said he understood Steve K just listened
 ultimately no further action was initiated because
 they ^{could} not get an answer & it became dark & too
 dangerous to move in darkness.

Based on the intel he gave me & that the trucks were
 mostly unoccupied & it presented little threat to
 our POC & members - he stressed this and that
 they were simply turning a corner onto Wellington
 and definitely not going to west end of Wellington
 'approved' plan. (I took picture of his schematic
 on my whiteboard)

Christiane took notes of the conversation.

1210 Noon presentation to Opp Chit Supt. Carson Purdy
 Supt. Craig Abrahams, Insp Tim Skinner (York), ^{Stok} Darwin
 Tetreault (Rcmp), Supt. Phil Lee (Rcmp) ^d (Colonel
 from Rcmp. Ottawa had, Robin Mulbrink (scruba), Jeff
 Leblanc, Mark Nemecoff, Kevin Kennedy, DC Bell,
 Christianne Kevin M. Patterson, Chit, me & Blair.
 notes taken by Scruba.

Take away, Chief was hostile when asked questions -
 negotiations were brought up by both Opp & Skinner -
 Craig Abrahams asked Patterson specifically about

if PCT were approved of the plan for Rideau -
Bureau - Patterson said they ^{had} were apprised of it
Abraham pushed to do it they were able to provide
feedback - Patterson said that Rob Drummond was
in charge of PCT - PCT had seen & approved input -
He I am aware that they have not seen the
plan and they have been shut down @ every stage
of the negotiations - left unanswered & in the dark.
Abraham knew that and that is why he pressed.
I believe Patterson misrepresented & was purposefully
vague & lied by omission - giving the impression
PCT had been involved.

The meeting was uncomfortable, and embarrassing for
me because of way Chief behaved. I believe all members
of OFC were embarrassed and the partners seemed taken
aback by his (Stoly's) demeanor and aggression.
meeting was over @ 1330ish - I spoke to Abraham
and I hoped Carson to apologize for way he was
treated and hoped they were not put off -
he called me as I was here and told me they
could all see what was happening and that he and
the others had our collective backs.

can we have a unified command?

Thursday Feb 10, 2022.

our conversation in former CIC - Emergency management specialist. who shared the following insights

• Why would you ignore decades of successful practices & lessons learned for a short term gain

me • Big Picture Thinking required - not focused on political wins

me • Our partners currently do not have faith or confidence in our approach - ability

• Trucks are a logistical impediment - otherwise same principles should apply - negotiate peaceful resolution till they will not negotiate any more.

• It's an impossible task ^{to take by force} ~~but nego~~

• We'll show them allude is a great risk mudrat to operations and ~~and~~ ^{all} people involved

• Any action taken w/ too overwhelming force will fail

• It will cause escalation of actions and someone will get hurt

• The way to win an actions on plan is

→ Speed, Surprise and domination

we will have no element of surprise

• No plan should go ahead without operational element of a strategic overarching plan

→ ie. heat up one for a day if it is present then wait - see how it will cause reaction. → NOT only options to consider

It's a LONG GAME - not a short one

Never mix PLT goal to gain intelligence w/ its about collaboration.

✓ Formal email to IC chain to get formal response

- agenda for meetings -

- Do we have anyone who greets people - provides understanding to them as to strategic goal

- At conclusion of meeting I asked for select few to remain on call because of the conversation about the

use of CIC Burnett on the plan for the Rideau / Sussex area. I did not agree with what Supt Patterson presented as the way the decision was made, he made it sound like Paul pushed his way in, when he actually was approached by Rob Drummond to take it - Paul & I discussed, as they were going to ask Isabelle to do it and we both agreed that it was not fair to put her into such a complicated scenario for so early on into her time as a CIC.

I advised I ~~could~~ ^{fundamentally} did not agree with the approach. that they had not allowed negotiations to take place - they did not give them the opportunity to negotiate fairly. I told them that as potential partners have huge concerns with the way things are running & I don't believe we are listening to them. I advised the OPP are horrified with ~~the~~ the Rideau / Sussex plan and that both Dave Springer's information was incorporated into Paul's decision.

Chief asked who we should have in to be ^{POW} ~~the~~ in-charge commander and I said for Dave Springer. at that time Mark Patterson said "Dave Springer - an Inspector" came in to my office ^{this morning} and told me what I should be doing - that he wasn't actually there.

The Chief responded by saying if he did that he would cut off Dave Springer's nuts. and call his boss and ...

The conversation continued to me telling them that our partners do not agree with us and they have done a ton of these

- Patterson said the OPP want to make sure this stays in Ottawa and has no interest in resolving this. They only want to negotiate and not do any actions on.

- I disagreed

- at that time Patterson asked to be on the record and the Christine Humeau tele notes because he knows for a fact that DC Ferguson has ~~been~~ conflict of interest and is going outside the chain because of my relationship with John Ferguson and he has to prove it.

Chief said this is the thing about Ottawa AS that people are married & Divorced 3x & love each other or hate each other.

- He then told me before end of day to have one PCT integrated to my level of satisfaction and to have it worked out to make sure they can execute ~~for us better~~ as much as possible

- I asked ~~for~~ ^{to} about if I was a barrier to their clear alignment to go hands on - I wanted to get out of that situation and that I was fighting on two fronts

I advised on call which chief had to get off to the call w/ Carnegie - Luchi ~~to~~ to Blair that we spent a lot of time running around getting #5 (all day on Saturday, apparently) for the chief and it is taking our efforts and energy away from actually addressing the demonstrators.

- In the last several weeks, there have been daily Navigator pop meetings for Command. I have begun to decline them because I believe it has begun to drive our operations and influence the Chief's decision around things like enforcement - which we know has been putting our officers @ risk for safety reasons. I have had the argument w/ DCBelt today on several occasions that we don't know what it is like out there, that we can give direction & encouragement to enforce where able, but not take away or appear to take away their discretion.

~~to~~ Conversed w/ Steve Baucher about what chief threatened us directly last Wednesday. It was shocked and thanked me as he said he had never heard it from someone credible first hand. I told him he should know for his own reputation as he vouches for him regularly. Steve was shocked. This convo was in my office @ 1055 - 1100. As I was a minute late for call w/ Chief + Command.

- I advised chief is looking for emails to support I/we purposely left him out of the information loop on the demo coming.

Robb. City crews can only start in morning from Michèle McChellagut (city) not safe to open roads for regular traffic - from Public Safety till tomorrow morning.

- Fence company - multi-day project - fence will take time to take down to control to see a safe escort to Parliamentarians
- Intel that 100 trucks are coming to Ottawa for noon tomorrow. - have been deceitful - strong posture at law enforcement & core to keep them out.

Robb Do not see being able to open Wellington till Sunday. announcements to media in conjunction to public safety

John St Why are we in a rush to open.

Can we get something from city - no rush from city
Roads are too dangerous in core because city is delayed due to weather - ice storm.

 Bell, Harker (via phone in To.)

Can we reduce observation officers?

Turned away 2 protesters who were looking to get
 hockey nets in secure ^{area} ~~sub~~ - authorities we
 are waiting under - EMCPA enforced.

Steve B: Concerns about intel "

over plan - Strategic - hold Wellington core.
 maintain observation posts - lawful authorities
 for illegal

Carson injunction - lawful use of access - needs to be
 ultra clear.

RCMP. 300 RCMP in town w/o lawful authority to
 enforce - common law authority

Carson Support that it's manage this posture w/o over-
 reaching the city?

Bell asking for increased posture for Friday + Saturday.

Carson 5 kms in either direction to be stopped / rolling closures in
 as needed.

Rob - Return Ottawa to state of normalcy. request of
 city + P.W. that observations be in place. Observing
 for unlawful behaviour + use all powers to
 4 days to demobilize the pieces that has been put
 in place. Police will support safety of this
 wanting to keep ~~separate~~ Rob believes we can produce
 a quick response in 20 minutes
 no demobilization from

observation posts? vs support & safety posture
